Panel Specifications and Fastening Recommendations

PAINT SYSTEMS

We use high quality paint systems designed to provide long term performance and protection. Each coating is formulated with thoroughly researched, tested and field proven pretreatments, primers, resins, and pigments that can meet your standard and performance requirements.

MS Colorfast45 is a thermoset coating system composed of polyester resin which has been modified with a silicone resin. Much like PVDF finish, the MS Colorfast45 finish offers good protection to the elements with special consideration to chalk and fade resistance, durability, and chemical resistance.
